

accurision®

The start-up company Accurision GmbH in Lustenau/Vorarlberg develops the high-precision, satellite-based positioning sensor GUIDANCE™ – a small but crucial component for autonomous driving. In order to improve the functionality and quality of our GUIDANCE™ GNSS sensor, we are looking for an

## Embedded Software Engineer (f/m)

### Your challenges:

- Design and development of the embedded software of our GUIDANCE™ GNSS sensor
- Analysis and continuous optimisation of the existing embedded software to increase stability, scalability, maintainability, testability and quality
- Software design, implementation, testing and documentation

### Your profile:

- A University or University of Applied Sciences degree in Electronic Engineering or Computer Science with professional experience or comparable education/professional experience
- In-depth expertise in embedded software development using C/C++
- Knowledge of ARM/Xilinx is an advantage
- Mindset for efficiency, productivity and creativity
- Experience in GNSS (Galileo, GPS) is an advantage
- Good written and spoken English, German is an advantage

### Our offer:

- Exciting and challenging tasks in the field of GNSS for autonomous driving
- Opportunity to play a decisive role in the development of our GUIDANCE™ sensor solution
- Working in a small team/young company
- Flexible working hours

### Interested?

Then we look forward to receiving your application by e-mail at: [gunnar.fleisch@accurision.com](mailto:gunnar.fleisch@accurision.com)

Legally compulsory note: The actual salary is above KV and is based on professional qualifications and experience, as well as the Vorarlberg labour market.
