

accurision®

The start-up company Accurision GmbH in Lustenau/Vorarlberg develops the high-precision, satellite-based positioning sensor GUIDANCE™ – a small but crucial component for autonomous driving. In order to improve the functionality and quality of our GUIDANCE™ GNSS sensor, we are looking for a

FPGA Engineer (f/m)

Your challenges:

- FPGA design and development of the FPGA architecture of our GUIDANCE™ GNSS sensor
- Analysis and continuous optimisation of the existing FPGA architecture to improve stability, functionality, maintainability, testability and quality
- Development of simulations and verification environments
- FPGA design, implementation, test and documentation

Your profile:

- A University or University of Applied Sciences degree in Electronic Engineering with professional experience or comparable education/professional experience
- Professional experience in FPGA design using VHDL/Verilog
- Professional experience in the implementation of digital signal processing algorithms in FPGA
- Mindset for efficiency, productivity and creativity
- Knowledge of development tools, such as Xilinx Vivado
- Experience in GNSS (Galileo, GPS) is an advantage, interest in GNSS
- Good written and spoken English, German is an advantage

Our offer:

- Exciting and challenging tasks in the field of GNSS for autonomous driving
- Opportunity to play a decisive role in the development of our GUIDANCE™ sensor solution
- Working in a small team/young company
- Flexible working hours

Interested?

Then we look forward to receiving your application by e-mail at: gunnar.fleisch@accurision.com

Legally compulsory note: The actual salary is above KV and is based on professional qualifications and experience, as well as the Vorarlberg labour market.
