

accurision®

The start-up company Accurision GmbH in Lustenau/Vorarlberg develops the high-precision, satellite-based positioning sensor GUIDANCE™ – a small but crucial component for autonomous driving.

To professionalise our development processes and for operational support of the development team, we are looking for a

Head of R&D (f/m)

Your challenges:

- Coordination and management of the development team, project management
- Further development of the existing product development process and the corresponding infrastructure
- Technical assistance in communication with/support for customers and suppliers
- Operational support of the development team
- Development of simulation and verification environments, such as hardware and firmware tests, reviews and documentation

Your profile:

- A University or University of Applied Sciences degree in Electronic Engineering or Computer Science with professional experience or comparable education/professional experience
- Several years of professional experience in the development of sophisticated products, high degree of initiative, creativity and independence, customer-oriented and entrepreneurial thinking
- Experience ideally in GNSS (GPS, Galileo), enthusiasm for GNSS
- Good written and spoken English, German is an advantage

Our offer:

- Exciting and challenging tasks in the field of GNSS for autonomous driving
- Opportunity to play a decisive role in the development of our GUIDANCE™ sensor solution
- Working in a small team/young company, flexible working hours

Interested?

Then we look forward to receiving your application by e-mail at: gunnar.fleisch@accurision.com

Legally compulsory note: The actual salary is above KV and is based on professional qualifications and experience, as well as the Vorarlberg labour market.
