

accurision®

The start-up company Accurision GmbH in Lustenau/Vorarlberg develops the high-precision, satellite-based positioning sensor GUIDANCE™ – a small but crucial component for autonomous driving. To take our GUIDANCE™ GNSS sensor to the next level, we are looking for a

Senior Digital Design Engineer (f/m)

Your challenges:

- Provide leadership during all phases of digital IC development: definition, requirements mapping, architectural design, RTL, VHDL/Verilog, synthesis, simulations, timing analysis, verification, etc.
- Technical communication with customers and partners, internal team leadership and communication
- Analysis and continuous optimisation of the GUIDANCE™ GNSS sensor architecture to improve stability, functionality, maintainability, testability and quality
- Generation of relevant documentation

Your profile:

- A University or University of Applied Sciences degree in Electronic Engineering with professional experience or comparable education/professional experience in digital integrated circuit design
- High level of proficiency in related aspects of digital IC design
- Experience and technical leadership in digital IC design, simulation, modelling, timing analysis and verification
- Mindset for efficiency, productivity and creativity
- Experience in GNSS (Galileo, GPS) is an advantage, interest in GNSS
- Very good written and spoken English, German is an advantage
- Ability to mentor

Our offer:

- Exciting and challenging tasks in the field of GNSS for autonomous driving
- Opportunity to play a decisive role in the development of our GUIDANCE™ sensor solution
- Working in a small and international team/young company, flexible working hours

Interested?

Then we look forward to receiving your application by e-mail at: katja.blum@accurision.com

Legally compulsory note: The actual salary is above the collective agreement and is based on professional qualifications and experience, as well as the Vorarlberg labour market.
